- The OITUK project team works closely with clients at all stages of the project, including design, implementation, testing, rollout and ultimately, support. All these activities are under the Project Management of OITUK.

C-Cube Solution Awards

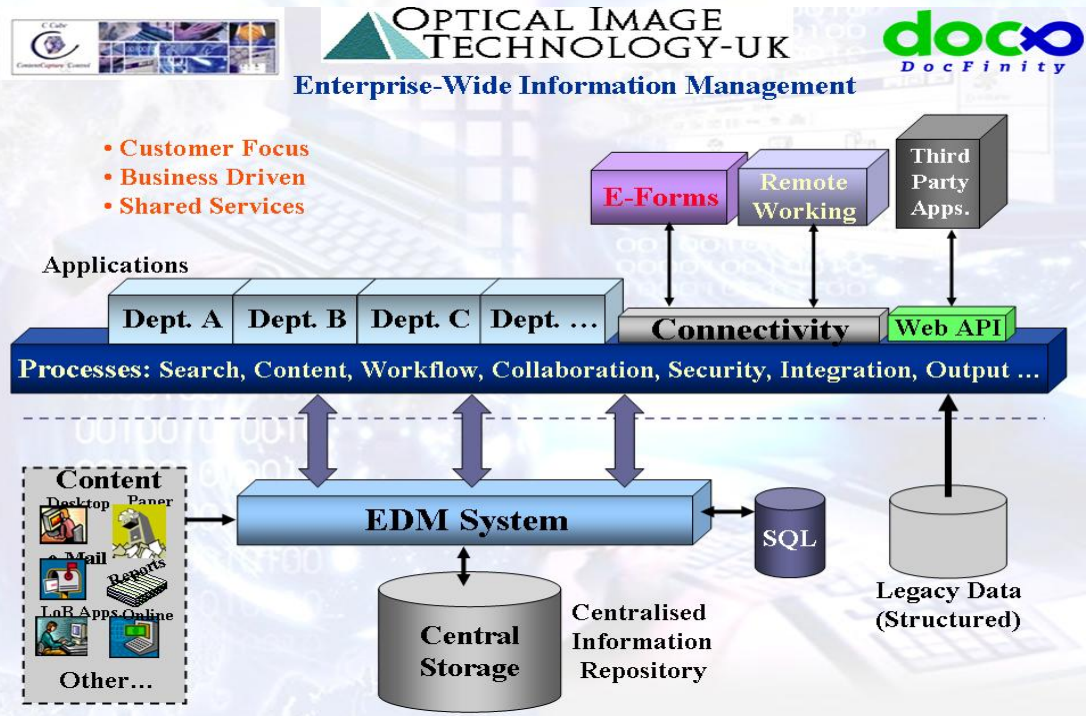

What is C-Cube?

C-Cube is the brand name for EDM & Workflow solutions provided by OITUK Ltd. These include DocFinity which is the leading Content Management software suite from Optical Image Technology Inc., USA, for which OITUK LTD., have exclusive licensing rights to sell and deploy solutions in the UK and Western Europe with value-added services and software applications.

The C-Cube solutions are based on a modular structure and open architecture, and provide a wide spectrum of capabilities including document imaging, COLDF, workflow, document and records management and web portal delivery. The solutions handle all document formats and provide an intuitive user interface for searching, tracking and retrieving documents. Users may also add / modify documents, participate in workflows and submit documents to specific output queues for printing or faxing. Tight integration with line-of-business applications is commonplace for automated indexing and transaction handling.

Typical Business Benefits:

- ▲ Dramatic Cost Savings
- ▲ Increased Productivity
- ▲ Solid Disaster Recovery
- ▲ Enabled E-Business
- ▲ Increased Audit and Control
- ▲ Reduced Paper Handling & Duplication
- ▲ Enhanced Process Efficiencies & Integration
- ▲ Increased Customer Loyalty

The diagram above highlights how C-Cube is fundamentally based on modular building blocks that connect with central networks and servers. At the heart of the topology is the C-Cube content capture engine, gathering diverse information sets from a variety of sources to compile an integrated repository. C-Cube then relates this content to existing information in other business applications to automate indexing and create cases of documents to work flow between users for completion of business transactions.
